

#378GTXOT

**ENDURA®**

# TENACTIV™ COMPOSITE FILAMENT FIBER GOAT-GRAIN DRIVER GLOVES WITH PADDED PALM GRIPS

Palm padding strips  
improves grip &  
increases durability

## AVAILABLE SIZES

## FEATURES

- High tensile-strength goatskin provides outstanding abrasion resistance
- TenActiv™ composite filament fiber blend provides 360° cut protection
- Strategically placed palm grips, increases durability and reduces bunching
- Hi-viz orange fingertips elevate the level of safety
- Sewing thread made with DuPont™ Kevlar® fiber for added seam integrity

### Note:

Also available in a winter version (#378GTXOTL)

Palm pad inserts patent-pending

## APPLICATIONS

Material Handling  
Construction  
Metal Fabrication  
General Labour

## TESTIMONIAL

DAN FERREIRA  
(SAFETY MANAGER)

We decided to switch to Superior Glove after testing them against multiple other leather gloves we ordered. After our trial period, the feedback from our crew was positive in all aspects. Durability wise, we were able to get more than twice the use out of one pair than what we were used to. The crew members also noted having a padded palm was a huge positive—when grinding or chipping all day, that little bit of extra cushion goes a long way. These gloves also fit true-to-size, offer better grip, and are comfortable, with no significant “breaking in” period required.
